

Defence/NGO

Shipping in containers is an economical and safe way of shipping most types of cargo. But putting cargo into a container also involves a constant risk of moisture damages for almost every kind of cargo on every voyage.

is a reliable partner with our head office in Sweden and an integrated, global supply chain. We have specialists following the specific needs in a wide range of industries so we can offer you effective moisture protective solutions.

ABSORINSIGHT

Defence and NGO (Non Governmental Organizations) goods consists of a great diversity of materials; metal parts, garments and textile, refined food (canned) etc. Consequently, the goods need to be protected against a variety of moisture damages. AbsorRange™ protects during initial, inbound delivery via storage to outbound shipping and storage at point of use.

Goods handled in these segments often encounter the following problems:

- Moisture damage that occurs during the long shipping at original purchase and during shipping to the desired destinations.
- Normally, the goods are stored for a long time before reaching the final destination. Often in locations without access to electricity and therefore the storage environment can not be properly controlled.

An easy and cost-efficient solution is to use desiccants to absorb the excess moisture during shipment, meaning goods arriving in the same condition as loaded.

Typical moisture damages

-  Peeling labels
-  Damaged packaging
-  Collapsed packaging
-  Bad or changed smell
-  Mould and mildew
-  Corrosion
